Culture

Stephanie: The way this impacted me was seeing the happiness on the kids faces. They don't get there hair done often and when they do it probably a luxury. We take this for granted. When I was younger I didn't get my hair done often. I can connect with them by having the same joy over similar things. They made me have a better day from helping them in a small way.

Maddox: The way this impacted me is because I grew up around it and I knew I would be a hairdresser. I love seeing peoples faces when u get to change there hair an make them feel better about themselves.

Jen:

The way this impacted me was seeing how happy you can make kids when they get their hair done. I grew up with lots of nurses in my family and I want to follow in their footsteps but I also wanted to do hair. When someone gets their hair done it always makes their day better and when my clients are happy I'm happy.

Content

Stephanie	Seeing the joy on kids faces. Hearing all the stories from what the kids had to say. I also learned the proper ways to style and wash there hair.	
Maddox	I loved how the volunteers who came in taught us how to wash and style curly hair. Talking to all the kids and hearing all the feedback from the hair washes, cuts and styles.	
Jen	I love how much we have learned from the people that come in and volunteer to teach us new things. I love talking to my clients and learning more about them.
